COOLTOUCH
SaphFire[™]
2.5F fiber

-  Proprietary protected tip gently guides through veins
-  Designed for use with a 4F Micro Introducer – virtually eliminating the routine use of a long sheath
-  Allows access and treatment of even the most damaged and tortuous veins
-  Save money by reducing procedure time and accessory cost
-  Blue fiber sleeve and shorter length (3.0 meters) enhance manageability
-  Single-use, sterile fiber - no preparation necessary
-  Exclusively designed for use with the CoolTouch CTEV[™] endovenous laser
